

ONLINE TRAINING PACKAGING PRINTING

Gravure printing and application technologies

Why should I attend this online training?

With the knowledge of this online training you will be able to identify, evaluate and optimize incorrect process parameters. In this training you will get a deep insight into the technologies of modern gravure packaging printing. In a virtual machine tour we will explain the most important machine components and their functions. You will get an overview of the interaction of the most important process parameters such as doctor blade settings, contact pressure, ink viscosity or printing speed and their effect on print quality. In addition, we also deal with standardization by means of color management.

Training content

- ✓ Detailed view of the gravure printing process
- ✓ Virtual machine tour with explanation of the different machine components and their functions
- ✓ Insight into the most important printing press parameters and their effects, such as doctor blade settings, print speed and many more
- ✓ Color management in gravure packaging printing

W&H TRAINING

In a W&H training course, you will receive practice-oriented training based on a fixed learning concept and with clearly defined learning objectives. You benefit from qualified trainers with many years of practical experience. Professional product and application knowledge go hand in hand in our training courses.
