

ONLINE TRAINING FIRST TIME RIGHT

First time right and efficient in packaging gravure printing

Why should I attend this online training?

In this practice-oriented online training participants receive an overview of various technologies, processes, methods and measuring techniques in modern packaging printing. We specifically address the gravure printing process, the preparation of print data and the production of various printing forms and their specific advantages and disadvantages.

The online training is accompanied by live video broadcasts from the W&H Technology Center: We impart practical application knowledge directly on our modern gravure presses. In the process we benchmark standard industry setup and coordination processes and provide recommendations for optimization. After the training participants are able to optimize and standardize processes to such an extent that production jobs can be released with no or no more than one color correction.

Training content

- ✓ Various technologies and processes in packaging printing
- ✓ Detailed insights into the gravure printing process
- ✓ Preparation of print data (reproduction)
- ✓ Print form production in gravure printing
- ✓ Color Management
- ✓ Ink formulation and ink preparation
- ✓ Benchmark of industry-standard and optimal setup and coordination processes

W&H TRAINING

In a W&H Training, you will receive practice-oriented training based on defined learning concepts and with clear learning objectives. You benefit from qualified trainers with many years of practical experience. Professional product and application knowledge go hand in hand in our training courses.
